

San Joaquin Valley
AIR POLLUTION CONTROL DISTRICT

OCT 28 2015

Mr. Dan Martin
E & J Gallo Winery - Livingston
18000 W River Road
Livingston, CA 95334

**Re: Notice of Minor Title V Permit Modification
District Facility # N-1237
Project # N-1152907**

Dear Mr. Martin:

Enclosed is the District's analysis of your application for minor Title V permit modification for the facility identified above. You proposed a Title V minor permit modification to incorporate recently issued N-1237-781-0 and N-1237-782-0 (under project N-1151495) into the Title V operating permit. E & J Gallo Winery was issued Authority to Construct permits for two carbon delivery systems each consisting of a carbon batching holding hopper served by a Dynamic Air dust collector and one 220 gallon carbon and wine mix tank.

Enclosed is the engineering evaluation with the following attachments: proposed Title V permit, recently issued N-1237-781-0 and N-1237-782-0, emission increases and application. This project will be subject to a 45-day EPA commenting period prior to the District taking final action.

If you have any questions, please contact Mr. Errol Villegas, Permit Services Manager, at (559) 230-5900.

Thank you for your cooperation in this matter.

Sincerely,

Arnaud Marjollet
Director of Permit Services

TITLE V APPLICATION REVIEW

Minor Modification
Project #: N-1152907

Engineer: Andrea Ogden
Date: October 27, 2015

Facility Number: N-1237
Facility Name: E & J Gallo Winery - Livingston
Mailing Address: 18000 W River Road
Livingston, CA 95334

Contact Name: John Chavez
Phone: (209) 394-5872

Responsible Official: Dan Martin
Title: Plant Manager - Livingston Winery

I. PROPOSAL

E & J Gallo Winery – Livingston is proposing a Title V minor permit modification to incorporate recently issued N-1237-781-0 and N-1237-782-0 (under project N-1151495) into the Title V operating permit. E & J Gallo Winery was issued Authority to Construct permits for two carbon delivery systems each consisting of a carbon batching holding hopper served by a Dynamic Air dust collector and one 220 gallon carbon and wine mix tank.

The purpose of this evaluation is to identify all applicable requirements, determine if the facility will comply with the applicable requirements and to provide the legal and factual basis for the proposed revisions.

II. FACILITY LOCATION

18000 W River Road, Livingston, CA

III. EQUIPMENT DESCRIPTION

N-1237-781-1: CARBON DELIVERY SYSTEM "A" CONSISTING OF ONE CARBON BATCHING HOLDING HOPPER SERVED BY A DYNAMIC AIR DUST COLLECTOR, AND ONE PERMIT EXEMPT 220 GALLON CARBON AND WINE MIX TANK (STORAGE OF ORGANIC MATERIAL WITH A CAPACITY OF 250

GALLONS OR LESS WHERE THE ACTUAL STORAGE TEMPERATURE DOES NOT EXCEED 150 F)

N-1237-782-1: CARBON DELIVERY SYSTEM "B" CONSISTING OF ONE CARBON BATCHING HOLDING HOPPER SERVED BY A DYNAMIC AIR DUST COLLECTOR, AND ONE PERMIT EXEMPT 220 GALLON CARBON AND WINE MIX TANK (STORAGE OF ORGANIC MATERIAL WITH A CAPACITY OF 250 GALLONS OR LESS WHERE THE ACTUAL STORAGE TEMPERATURE DOES NOT EXCEED 150 F)

IV. SCOPE OF EPA AND PUBLIC REVIEW

This change to a Title V permit is considered to be a minor modification and, as such, requires no public review.

V. APPLICABLE REQUIREMENTS

District Rule 2520, Federally Mandated Operating Permits (Adopted June 21, 2001)

VI. DESCRIPTION OF PROPOSED MODIFICATIONS

E & J Gallo Winery proposes to install two carbon delivery systems used for the purpose of adding carbon to wine.

Carbon in sacks will be hand dumped into a hopper. The bags will be placed on the grit hopper and an enclosed vent hood is closed. The bags are split open during the process when the hood is closed. Any generated particulate matter will be captured within a dust hood and vacuumed through the Dynamic Air dust collector.

Once dumped, the carbon mixes with wine in a 220 gallon stainless steel tank. The mixing time of the carbon and wine in the small tank is approximately two minutes. During the harvest period, these systems will operate continuously with the wine level in the mix tank remaining at a constant level at all times. After the two minute mix period, the material will be introduced into larger wine tanks for further contact time and processing.

Condition 1 from the ATCs was not included on the proposed Permit to Operate because the requirement has been fulfilled with the submission of this application and is not applicable for an Operating Permit.

Condition 2 from the ATCs was not included on the proposed Permit to Operate because it is already included as condition 41 in the facility-wide requirements of the Operating Permit.

VII. COMPLIANCE

In accordance with Rule 2520, 3.20, these modifications:

1. Do not violate requirements of any applicable federally enforceable local or federal requirement;
2. Do not relax monitoring, reporting, or recordkeeping requirements in the permit and are not significant changes in existing monitoring permit terms or conditions;
3. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;
4. Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject. Such terms and conditions include:
 - a. A federally enforceable emission cap assumed to avoid classification as a modification under any provisions of Title I of the Federal Clean Air Act; and
 - b. An alternative emissions limit approved pursuant to regulations promulgated under section 112(i)(5) of the Federal Clean Air Act; and
5. Are not Title I modifications as defined in District Rule 2520 or modifications as defined in section 111 or 112 of the Federal Clean Air Act; and
6. Do not seek to consolidate overlapping applicable requirements.

In accordance with Rule 2520, the application meets the procedural requirements of section 11.4 by including;

1. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
2. The source's suggested draft permit; and
3. Certification by a responsible official that the proposed modification meets the criteria for use of minor permit modification procedures and a request that such procedures be used.

- D. Application

ATTACHMENT A

Proposed Title V Operating Permit

San Joaquin Valley Air Pollution Control District

PERMIT UNIT: N-1237-781-1

EXPIRATION DATE: 09/30/2015

EQUIPMENT DESCRIPTION:

CARBON DELIVERY SYSTEM "A" CONSISTING OF ONE CARBON BATCHING HOLDING HOPPER SERVED BY A DYNAMIC AIR DUST COLLECTOR, AND ONE PERMIT EXEMPT 220 GALLON CARBON AND WINE MIX TANK (STORAGE OF ORGANIC MATERIAL WITH A CAPACITY OF 250 GALLONS OR LESS WHERE THE ACTUAL STORAGE TEMPERATURE DOES NOT EXCEED 150 F)

PERMIT UNIT REQUIREMENTS

1. Visible emissions from the dust collector serving the carbon batching hopper shall not equal or exceed 5% opacity for a period or periods aggregating more than three minutes in any one hour. [District Rule 2201] Federally Enforceable Through Title V Permit
2. Material removed from the dust collector shall be disposed of in a manner preventing entrainment into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
3. All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere. [District Rule 2201] Federally Enforceable Through Title V Permit
4. Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration. [District Rule 4201] Federally Enforceable Through Title V Permit
5. The dust collector shall be maintained and operated according to manufacturer's specifications. [District Rule 2201] Federally Enforceable Through Title V Permit
6. The cleaning frequency and duration for the dust collector shall be adjusted to optimize the control efficiency. [District Rule 2201] Federally Enforceable Through Title V Permit
7. Replacement bags numbering at least 10% of the total number of bags in each dust collector shall be maintained on the premises. [District Rule 2201] Federally Enforceable Through Title V Permit
8. The baghouse shall be equipped with a pressure differential gauge to indicate the pressure drop across the bags. The gauge shall be maintained in good working condition at all times and shall be located in an easily accessible location. [District Rule 2201] Federally Enforceable Through Title V Permit
9. The dust collector shall operate at all times with a minimum differential pressure of 0 inches water column and a maximum differential pressure of 6 inches water column. [District Rule 2201] Federally Enforceable Through Title V Permit
10. Controlled PM10 emissions from the dust collector shall not exceed 0.2 lb/ton carbon material throughput. [District Rule 2201] Federally Enforceable Through Title V Permit
11. Maximum amount of carbon material throughput shall not exceed either of the following: 12,000 pounds per day or 150,000 pounds per year. [District Rule 2201] Federally Enforceable Through Title V Permit
12. Differential operating pressure for the dust collector shall be monitored and recorded on each day that the dust collector operates. [District Rule 2201] Federally Enforceable Through Title V Permit
13. Records of all maintenance of each dust collector, including all change outs of filter media, shall be maintained. [District Rule 2201] Federally Enforceable Through Title V Permit

PERMIT UNIT REQUIREMENTS CONTINUE ON NEXT PAGE

These terms and conditions are part of the Facility-wide Permit to Operate.

14. Records of daily and annual amount of carbon material throughput shall be maintained. [District Rule 2201] Federally Enforceable Through Title V Permit
15. All records shall be maintained and retained on-site for a period of at least 5 years and shall be made available for District inspection upon request. [District Rule 1070] Federally Enforceable Through Title V Permit

These terms and conditions are part of the Facility-wide Permit to Operate.
